

Project Demo Planning

Date	13-07-2026
Team ID	
Project Name	Automated Credit Card Approval Prediction using Machine Learning
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Explain the project objective, problem statement, and the need for automating the credit card approval process.	1	Dabbeeru Sarath Kumar
2	User Interface	Demonstrate the Home page, About page, and Credit Card Prediction form where applicant details are entered.	1	Dabbeeru Sarath Kumar
3	Credit card Prediction	Enter sample applicant information and demonstrate how the system predicts Approved or Rejected .	1	Dabbeeru Sarath Kumar
4	Model Explanation	Explain the Machine Learning model (Random Forest / Best Model), preprocessing steps, and prediction workflow.	1	V Raja
5	Testing	Test the application with different applicant profiles and verify the prediction results.	1	V Raja
6	Conclusion	Summarize the project, discuss future enhancements, and answer questions from the evaluators.	1	V Raja

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the challenges in manual credit card approval, project objectives, and expected benefits.
2	Solution Overview	Describe the Flask web application, the trained Machine Learning model, dataset, preprocessing steps, and prediction workflow..

3	Live Feature Demonstration	Enter sample applicant details, submit the form, and demonstrate the approval or rejection prediction generated by the system..
4	Q&A Session	Answer questions related to the Machine Learning model, Flask application, dataset, deployment, and conclude the demonstration.
